Nothing Else Matters/Metallica

```
/ = pim a m i
<u>Intro</u>
Em
                     Am
                                                      D
                                                          Em
                                                                / / /
////
            /(pim) / / (pim a) (לה, סי)
Em
       D
            С
                  Em
                         D
                              С
                                      Em
                                             D
                                                  C G
                                                           B7
                                                                 Em
                             С
Em
                   D
 So close no matter how far
                                     C
Em
 Couldn't be much more from the heart
                 D
 Forever trusting who we are
      В
                 Em
 And nothing else matters
Em
                 D
                             С
 Never opened myself this way
Em
               D
 Life is ours, we live it our way
                                C
                 D
 All these words I don't just say
      В
                  Em
 And nothing else matters
                          С
Em
                D
 Trust I seek and find in you
                              С
Em
                 D
 Every day for us something new
                D
Open mind for a different view
     В
                Em
 And nothing else matters
```

```
chorus:
CAD
                                     Α
  /
      Never cared for what they do
D
  Never cared for what they know
D
      Em
  But I know
repeat 1st verse
chorus
repeat 2nd and 3rd verse
CAD
                                С
                                     Α
      Never cared for what they say
D
  Never cared for what they play
D
                                 Α
  Never cared for what they do
D
                           С
                                 Α
```

Never cared for what they know

D

Em

But I know
